Community Program

Thursday
May 19th 2016
7PM to 8PM

McClintock
Middle School
Media Room
1925 Rama Rd
Charlotte, NC 28212

Charlotte's urban forest is old, fragile and depleting.

Major development continues in all regions of the city with clear-cutting as the "method of choice" by developers. In order to meet Charlotte's strategic goal of 50% tree canopy by the year 2050, a total of 500,000 trees must be planted. Trees Charlotte was born out of this commitment to preserving and expanding the most precious natural resource of our City.

Learn about the many benefits of a healthy Urban and suburban forest and how you can get involved.

How does Charlotte rank in tree canopy compared to similar cities?

Where do the trees come from that are used in TreesCharlotte projects?

What is the:
Best time to plant?
Best tree to plant?
Best tree for wildlife?

CROWN is the Charlotte Chapter of the North Carolina Wildlife Federation.
